## What Is RedotPay? The Global Crypto Card Explained

RedotPay is a Hong Kong-based fintech platform that bridges the gap between cryptocurrency holdings and real-world everyday spending. At its core, RedotPay provides a Visa prepaid card — available in both virtual and physical formats — that allows you to spend Bitcoin, Ethereum, USDT, USDC, Solana, and over 20 other cryptocurrencies at more than **130 million merchants, point-of-sale terminals, and ATMs worldwide** that accept Visa.

The mechanism is straightforward: you deposit cryptocurrency into your RedotPay wallet via the mobile app, and when you make a purchase, RedotPay automatically converts your chosen crypto to the local fiat currency at the point of sale. There is no need to manually sell crypto, transfer funds to a bank, or wait for settlement delays. The conversion happens invisibly in the background, making the experience identical to using a traditional debit card.

Founded to serve the growing global community of crypto holders who want practical spending utility, RedotPay has achieved unicorn status — a valuation exceeding \$1 billion — following a \$40 million Series A round in March 2025 and an additional \$47 million strategic round later that year. Assets are custodied by **Fireblocks**, one of the most trusted institutional crypto custody providers in the world, and the platform holds **PCI DSS 4.0 certification** — the gold standard for payment card data security.

### Key Features at a Glance

#### Visa Prepaid Card (Virtual & Physical)

The virtual card (\$10) is issued within minutes of KYC approval and can be used immediately for online purchases. The physical Visa card (\$100) enables in-store tap-to-pay transactions and ATM

cash withdrawals worldwide.

### **Apple Pay, Google Pay & Samsung Pay**

Add your RedotPay virtual card to Apple Pay or Google Pay for contactless in-store payments. As of early 2026, all RedotPay virtual cards support mobile payment integration — a major upgrade that puts it on par with traditional banks.

### **Multi-Crypto Funding**

Fund your card with BTC, ETH, USDT, USDC, SOL, TRX, BNB, XRP, TON, and over 20 additional digital assets. USDT and USDC via Tron (TRC-20) are particularly popular due to ultra-low deposit gas fees — under \$0.01 per transfer.

### **Industry-Leading Spending Limits**

Spend up to \$100,000 per single transaction and up to \$1 million per day — the highest published limits in the crypto card category, making RedotPay suitable for both everyday users and high-volume business spending.

### **Global Coverage — 130M+ Merchants**

Anywhere Visa is accepted — online stores, supermarkets, restaurants, hotels, fuel stations, subscription services like Netflix and Spotify — your RedotPay card works. Available in 100+ countries across Asia, Europe, Latin America, Africa, and the Middle East.

### **No Annual or Monthly Fees**

RedotPay charges zero ongoing fees. You pay once for card issuance (\$10 virtual, \$100 physical) and the only recurring costs are per-transaction fees of 1% (USD) or 2.2% (non-USD). No subscription. No inactivity fees.

### **Referral Programme — Earn Up to 40% Commission**

Beyond the \$10 sign-up bonus from code rjqv1, RedotPay operates a tiered referral programme. Refer friends and earn a percentage commission on their card activation fees and ongoing spending transactions, with rates increasing as your referral network grows. Secondary commission (10% of your referees' commission) is also earned when your referrals invite others.

### **Crypto Credit Account**

RedotPay offers a crypto-backed credit feature, allowing users to deposit supported digital assets as collateral and receive a spending credit line — without selling your crypto holdings.

### **Solana Card (Launched Feb 2026)**

A dedicated Solana Card launched in February 2026, enabling SOL and Solana ecosystem token holders to fund and spend without cross-chain bridging. During launch, users earned 1.5–3% cashback on the first three daily transactions.

### **Telegram Mini-App Integration**

RedotPay integrates with Telegram, allowing instant USDT top-ups via the TON network directly from Telegram's interface — a major convenience feature for the large crypto-native Telegram user base.

---

## **How the rjqv1 Referral Code Bonus Works**

Understanding exactly how the \$10 bonus is structured prevents surprises. Here is a complete breakdown of what to expect after signing up with referral code rjqv1:

Aspect	Details
<b>Bonus Amount</b>	\$10 credited upon first card activation
<b>When You Receive It</b>	After your first RedotPay card is activated and verified
<b>How It Can Be Used</b>	For purchases at any Visa-accepting merchant worldwide
<b>Withdrawable?</b>	No — bonus is spending credit, not withdrawable cash
<b>Expiry</b>	30 days from credit date — use it promptly after activation
<b>Can Pay Card Fee?</b>	No — card issuance fee must be paid from your own funds
<b>Multiple Codes?</b>	Only one referral code can be applied per account
<b>Existing Users?</b>	Codes must be entered at registration — cannot add later

Important: The \$10 bonus from code rjvq1 is spending credit — not withdrawable cash. Think of it as \$10 pre-loaded on your card for your first purchases anywhere Visa is accepted. The card issuance fee (\$10 for virtual) must be paid separately from your own deposited crypto. So: deposit crypto to cover the \$10 card fee, activate your card, and the \$10 bonus is credited for you to spend immediately.

## How to Use RedotPay Referral Code rjvq1 — Step-by-Step

The entire process from download to active card takes under 15 minutes for most users. Follow every step carefully — especially Step 3, where the referral code must be entered. It cannot be added after account creation.

### Step 1: Download the RedotPay App

Visit the Apple App Store (iOS) or Google Play Store (Android) and search for 'RedotPay'. Download the official app published by RedotPay Ltd. Alternatively, open your mobile browser and go directly to: <https://wap.redotpay.com/en/invite/?referralId=rjvq1> — this link will auto-fill your referral code and guide you to download.

### Step 2: Open the App and Begin Registration

Launch RedotPay and tap 'Sign Up'. You can register using your email address, mobile phone number, Google account, or Apple ID. Choose the method that suits you best. All registration methods qualify for the referral bonus.

### Step 3: Enter Referral Code rjvq1 — CRITICAL STEP

During the registration screen, look for the field labelled 'Referral Code (Optional)' or 'Invite Code'. Type: rjvq1 (all lowercase, no spaces). This step MUST be completed during initial sign-up. RedotPay's official policy states that referral codes cannot be added to existing accounts after registration is complete. Do not skip this step.

### Step 4: Complete KYC Identity Verification

RedotPay requires full KYC (Know Your Customer) verification to unlock card features. This involves: submitting a government-issued photo ID (passport, national ID card, or driver's licence), taking a real-time face scan, and in some regions, providing a brief personal statement. Most KYC submissions are approved within 5–30 minutes. Some may take up to 24 hours.

### Step 5: Deposit Cryptocurrency to Your Wallet

Navigate to 'Wallet' in the app and select 'Deposit'. Choose your preferred cryptocurrency and network. To minimise gas fees, USDT via Tron (TRC-20) is highly recommended — deposits typically cost under \$0.01. Ensure you deposit at least \$10 worth of crypto to cover the virtual card issuance fee.

### Step 6: Apply for Your RedotPay Card

Go to the 'Card' section in the app. Select 'Virtual Card' (\$10 issuance fee) for immediate online use and Apple Pay/Google Pay, or 'Physical Card' (\$100) for in-store spending and ATM access. The virtual card is typically issued within 5–10 minutes of payment and KYC approval.

### Step 7: Activate Your Card and Receive Your \$10 Bonus

Once your card is issued, complete the activation step within the app. After successful first card activation, the \$10 bonus from referral code rjvq1 will be credited to your account. The bonus is valid for 30 days — use it for any purchase at Visa-accepting merchants worldwide.

### Step 8: Add to Apple Pay or Google Pay (Optional but Recommended)

For contactless in-store spending, add your RedotPay virtual card to Apple Pay (tap the '+' in the Wallet app on iPhone) or Google Pay. Once linked, you can tap to pay at any contactless terminal using your smartphone — just like a regular bank card, but powered by crypto.

**Sign Up Now With Referral Code for Your \$10 Bonus:**

**Referral Code: rjvq1**

<https://wap.redotpay.com/en/invite/?referralld=rjvq1>

## RedotPay Fee Structure — Complete Breakdown

Transparency around fees is essential before committing to any financial product. Here is RedotPay's full published fee schedule as of May 2026:

Fee Type	Amount	Notes
Virtual Card Issuance	\$10	One-time, no renewal fee
Physical Card Issue	\$100	Includes worldwide shipping
Annual Fee	\$0	No monthly or annual charges
USD Transactions	1%	Most competitive rate in category
Non-USD Transactions	2.2%	1% conversion + 1.2% FX fee
ATM Withdrawal	2%	Physical card only
Crypto Transfer In	Free	Send crypto to card wallet
P2P Transfer	Free	Send to other RedotPay users
Spending Limit	\$100K/txn	\$1M daily (highest in category)

In practice, RedotPay's 1% USD transaction fee is competitive with leading crypto cards on the market. For USDT holders using the Tron network for deposits, the combined cost of funding and spending is among the lowest available anywhere. The \$10 sign-up bonus from code rjqv1 effectively offsets the virtual card issuance cost entirely — making your first card free in spending power terms.

---

## Is RedotPay Safe? Security and Legitimacy Review

RedotPay is a fully licensed, regulated, and institutionally-backed financial platform. Here is a complete overview of its security infrastructure:

### Regulatory Licences

RedotPay holds multiple money service and Virtual Asset Service Provider (VASP) licences across regulated jurisdictions including Lithuania and Argentina. It operates under Hong Kong's financial regulatory framework.

### Fireblocks Custody

Customer assets are custodied by Fireblocks — the same institutional-grade custody provider used by Goldman Sachs, BNY Mellon, and hundreds of major financial institutions. This is a tier-1 security provider.

### PCI DSS 4.0 Certified

RedotPay holds PCI DSS Level 1 4.0 certification — the highest standard for payment card industry data security. This governs how card data is stored, processed, and transmitted.

### \$42M+ Insurance

User assets benefit from over \$42 million in insurance coverage through RedotPay's custodial partners, providing an additional layer of protection against operational risks.

### Beosin Real-Time Monitoring

All transactions are monitored in real-time by Beosin, a leading blockchain security firm, for suspicious activity, fraud, and AML compliance.

### Multi-Factor Security

Accounts are protected by 2FA (two-factor authentication), passkeys, anti-phishing codes, gesture passwords, and biometric login options.

### Instant Card Controls

Freeze or unfreeze your card instantly from the app. Set custom spending limits. Receive real-time transaction notifications to detect unauthorised use immediately.

### Circle Partnership

RedotPay partners with Circle — the issuer of USDC — for stablecoin infrastructure, providing access to one of the most audited and regulated stablecoins in the market.

### Venture Backing

Backed by Coinbase Ventures, Lightspeed, Accel, Pantera Capital, and Galaxy Digital — five of the most respected investors in global crypto and fintech. This institutional backing adds a significant credibility layer.

RedotPay Legitimacy Verdict: RedotPay is a licensed, regulated, institutionally-backed financial platform with 6M+ users and \$10B+ annualized payment volume. Its Fireblocks custody, PCI DSS 4.0 certification, multi-licence regulatory status, and \$42M+ insurance coverage place it among the most credible crypto card providers globally. Using referral code rjqv1 to sign up is safe.

## RedotPay vs Other Crypto Cards — Side-by-Side Comparison

How does RedotPay with referral code rjqv1 stack up against competing crypto spending cards in 2026? Here is an honest comparison:

Feature	RedotPay (code rjqv1)	Crypto.com Card	Binance Card	Bybit Card
Sign-Up Bonus	<b>\$10 on activation</b>	Varies	None	Varies
Annual Fee	<b>Free</b>	Free (basic)	Free	Free
Virtual Card	<b>\$10</b>	Free (basic)	Free	Free
Countries	<b>100+</b>	40+	Limited	Limited
Apple Pay	<b>Yes</b>	Yes	No	Yes
ATM Access	<b>Yes</b>	Yes	Yes	Yes
Staking Required	<b>No</b>	Yes (CRO)	No	No
Cashback	<b>Promos only</b>	Up to 5%	Up to 8%	Up to 2%
Max Spend/Txn	<b>\$100,000</b>	Lower	Lower	Lower
Fireblocks Custody	<b>Yes</b>	No	No	No

RedotPay's strongest competitive advantages are: (1) broader country availability than most major competitors, (2) no staking or token lock-up requirement for card access, (3) the highest per-transaction spending limits in the category (\$100K/txn), (4) institutional-grade Fireblocks custody, and (5) the \$10 sign-up bonus via referral code rjqv1. Crypto.com and Binance offer higher cashback rates but require significant staking commitments. RedotPay is the better fit for users who want simple global access without locking up funds.

---

## Who Is RedotPay Best For?

### Crypto Holders Who Want to Spend

If you hold BTC, ETH, USDT, USDC, or other digital assets and want a simple, reliable way to spend them at any store — online or in person — without selling and waiting for bank transfers, RedotPay is purpose-built for you.

### Digital Nomads and Frequent Travellers

RedotPay works in 100+ countries with competitive transaction fees and ATM access. No annual fees, no currency lock-in, and Apple Pay/Google Pay support makes it an ideal travel companion for the globally mobile.

### USDT and Stablecoin Users

For those who hold stablecoins (USDT/USDC) and want to convert them to real-world spending power, RedotPay is one of the best and most accessible platforms available — especially via the low-cost TRC-20 Tron deposit route.

### **Users in Underserved Regions**

RedotPay covers many markets in Africa, Southeast Asia, Latin America, and the Middle East where alternatives like Crypto.com Card or Binance Card have restricted availability. For users in these regions, it is often the most accessible quality crypto card option.

### **High-Volume Spenders and Businesses**

With a \$100,000 per-transaction spending limit and \$1 million daily limit — the highest published figures in the crypto card space — RedotPay serves businesses and high-volume individuals who need serious spending power.

### **Solana Ecosystem Users (2026)**

The February 2026 Solana Card launch makes RedotPay the go-to card for SOL holders, eliminating the need to bridge to another network before spending.

---

## **Frequently Asked Questions — RedotPay Referral Code rjqv1**

### **Q: What is the RedotPay referral code for a \$10 bonus?**

A: The verified referral code is rjqv1. Enter this code in the 'Referral Code (Optional)' field during account registration on RedotPay. You will receive a \$10 bonus credited to your account upon your first card activation. The direct sign-up link is: <https://wap.redotpay.com/en/invite/?referralId=rjqv1>

### **Q: Is the RedotPay referral code rjqv1 still working in 2026?**

A: Yes. The code rjqv1 is verified and active as of May 2026. If you prefer, use the direct invite link which automatically applies the code: <https://wap.redotpay.com/en/invite/?referralId=rjqv1>

### **Q: Can I add a referral code after I have already signed up?**

A: No. RedotPay's official policy states that referral codes must be entered during the initial registration process. They cannot be applied to existing accounts retroactively. If you want the \$10 bonus, you must enter code rjqv1 before completing your account creation.

### **Q: Can the \$10 bonus be used to pay for the card issuance fee?**

A: No. The \$10 bonus from referral code rjqv1 is spending credit that is applied after your card is activated — it cannot be used to pay the \$10 virtual card issuance fee. You must deposit your own cryptocurrency to cover the card fee separately, then the bonus is credited for use in purchases afterwards.

### **Q: What cryptocurrencies can I use to fund my RedotPay card?**

A: RedotPay supports BTC, ETH, USDT, USDC, SOL, TRX, BNB, XRP, TON, and over 20 additional cryptocurrencies via the multi-currency wallet. USDT via Tron (TRC-20) is the recommended funding method due to near-zero gas fees. Supported networks include Ethereum, Arbitrum, Polygon, Solana, TON, and Sui.

### **Q: How long does KYC verification take on RedotPay?**

A: Most KYC submissions are processed within 5 to 30 minutes. Complex cases or users in certain jurisdictions may take up to 24–48 hours. The process requires a government-issued photo ID, a real-time face scan, and in some regions, a personal statement. Approval unlocks full card and

wallet features.

**Q: Does RedotPay work with Apple Pay and Google Pay?**

A: Yes. As of early 2026, RedotPay officially supports Apple Pay, Google Pay, and Samsung Pay. Add your virtual card to your mobile wallet for contactless tap-to-pay at any NFC-enabled payment terminal. This feature is free to set up and available to all verified RedotPay card holders.

**Q: Is RedotPay available in my country?**

A: RedotPay operates in 100+ countries across Asia, Europe, Latin America, Africa, and the Middle East. It is currently not available to US residents, and is also unavailable in Ukraine, Russia, and a small number of other markets. Check current country availability by downloading the app and checking the supported regions list during registration.

**Q: How do I earn money from the RedotPay referral programme?**

A: Once registered with code rjvq1, you will receive your own unique referral code and link. Share these with friends. When they sign up and activate a card, you earn a commission on their card activation fee. You also earn ongoing commission (a percentage of their spending transaction fees) and secondary commissions when your referrals invite others. Commission rates increase as your referral network grows through tiered levels.

**Q: What is the difference between the RedotPay virtual and physical card?**

A: The virtual card (\$10) is a digital card number used for online purchases, Apple Pay, and Google Pay. It is issued within minutes and has no physical presence. The physical Visa card (\$100) is a standard payment card delivered to your address, enabling in-store chip and PIN payments and ATM cash withdrawals worldwide. Both card types are linked to the same RedotPay wallet.

**Q: Is RedotPay safe and legitimate?**

A: Yes. RedotPay is a licensed VASP (Virtual Asset Service Provider) operating under regulatory frameworks in multiple jurisdictions. Assets are custodied by Fireblocks, the platform holds PCI DSS 4.0 certification, has \$42M+ insurance coverage, and is backed by Coinbase Ventures, Lightspeed, Pantera Capital, and Galaxy Digital. It has 6M+ users and processes \$10B+ annually.

**Q: Does RedotPay offer cashback rewards?**

A: Standard RedotPay cards do not have an ongoing cashback programme. However, promotional cashback events do run periodically. The February 2026 Solana Card launch offered 1.5%–3% cashback on the first three daily transactions. Watch the app for promotional campaigns. The referral programme also provides ongoing passive income that effectively functions as a cashback equivalent.

---

## 5 Tips to Get the Most Out of RedotPay

### Deposit via Tron (TRC-20) to Minimise Fees

When topping up your RedotPay wallet with USDT or USDC, always select the Tron (TRC-20) network. Gas fees on Tron are typically under \$0.01 per transfer — compared to \$1–\$5+ on Ethereum mainnet. This maximises how much of your deposit reaches your card balance.

### Use Your \$10 Bonus for a Recurring Subscription

The 30-day spending credit works perfectly for monthly subscription services like Netflix, Spotify, ChatGPT Plus, or Amazon Prime. Link your RedotPay virtual card to a service, use the \$10 bonus as

the first payment, and continue with your regular crypto balance thereafter.

### **Share Your Referral Code for Passive Income**

After signing up with rjvq1 and activating your card, head to your profile and find your unique referral code and link. Share it on social media, Telegram groups, Reddit, or YouTube. Every successful referral earns you commission — creating a stream of passive income from your network.

### **Combine Virtual + Physical Cards for Full Coverage**

The virtual card covers all online purchases and contactless payments via Apple/Google Pay. The physical card adds ATM access and in-store chip payments at merchants without NFC. Together, they cover 100% of spending scenarios globally.

### **Monitor the App for Promotional Cashback Events**

RedotPay periodically runs enhanced cashback promotions — the Solana Card launch in February 2026 offered up to 3% cashback. Enable push notifications in the app so you never miss a limited-time offer or fee discount campaign.

---

## **Claim Your \$10 Bonus — Sign Up With Code rjvq1 Today**

RedotPay is one of the most accessible, feature-rich, and institutionally secure crypto spending cards available in 2026. With 6M+ users, \$10B+ in payment volume, Fireblocks custody, Apple Pay support, 130M+ merchant acceptance, and the highest per-transaction spending limits in the category — it delivers genuine utility for crypto holders worldwide. Using referral code rjvq1 gives you a \$10 head start the moment your card activates.

The entire sign-up process takes under 15 minutes. Download the app, enter code rjvq1 during registration, complete KYC, deposit enough crypto to cover the \$10 virtual card fee, and your \$10 bonus is credited immediately upon activation. No staking requirement. No annual fees. No lock-up periods.

**Get Your \$10 RedotPay Bonus — Register with Referral Code:**

**Referral Code: rjvq1**
